BATTLE RIVER RALLY AND CONVENTION

BATTLE RIVER RALLY AND
CONVENTION, JULY 15-16
AT WAINWRIGHT

The Battle River U.F.A. and U.F.W.A. Constituency Association:
A U.F.A. Rally and the Annual Convention of the above association will be held at Wainwright on Monday and Tuesday, July 15th and 16th.

Somewhat different arrangements have been made this year from previous years. At the last convention it was decided to hold an open air meeting in the Buffalo Park on the afternoon of the first day, Monday, July 15th, 1929.

The committee in charge, have arranged for games, etc., during the afternoon, a picnic lunch at 6 p.m., followed by a few short speeches, and a musical program.

The park, its lake swimming pool and other attractions, is an ideal place to hold a picnic, and by taking advantage of this we will be able to combine business with pleasure.

The speakers are to be: H. E. Spencer, M. P., who will give his annual report on the past session at Ottawa; William Irvine, M.P., Mrs. A. H. Warr, U.F.W.A. President, Hon. R. G. Reid, J. R. Love, W. G. Farquharson and P. Enzenauer, members of the Alberta Legislature.

H. A. DREANY, PIONEER OF SEDEGWICK, DROPS DEAD

H. A. Dreany, pioneer resident and prominent politician, of Sedgewick, dropped dead at his home in Sedgewick about 10:30 o'clock last Sunday morning.

The funeral service was held Monday evening and the remains taken by C. P. R. to Vancouver, B. C., for interment.

SPECIAL TRAIN EDMONTON FAIR

The Canadian National Railways are running a special train from Wainwright to Edmonton on Tuesday, July 16th, returning the same day. This will give those who intend to take in at least one day of the fair to go and return the same day.

Following is the schedule:
Leave Wainwright at 6:45 p.m.
Leave Irma at 7:22 A. M.
Leave Viking at 8:15 A. M.
Leave Bruce at 8:39 A. M.
Leave Holden at 8:59 A. M.
Leave Ryley at 9:20 A. M.
Arrive Edmonton at 11:30 A. M.
Leave Edmonton at 11 P. M.

Geo. BENNETT WILL ADDRESS LOCAL WHEAT POOL MEETINGS

Mr. Geo. Bennett, director of the Wheat Pool, will address public meetings as follows:

Fabyan, July 22nd, 2 P. M.
Irma, July 23rd, 2 P. M.
Jarow, July 24th, 2 P. M.
Bruce, July 25th, 2 P. M.
Phillips, Friday, July 26th, 2 P. M.
Viking, July 27th, 2 P. M.
Everybody invited whether pool members or not. Come and hear what the pool is doing.

AGED LADY FALLS DOWN INTO CELLAR

Mistaking the cellar door for the outside entrance, Mrs. Jessie Robertson, 84 years, fell down a flight of steps at the home of her daughter, Mrs. A. G. Walker, 9026 Sunnyside boulevard, and fractured her left wrist, two ribs and the pelvis bone.

She was admitted to the general hospital this afternoon. An X-ray revealed the extent of her injuries.

Mrs. Robertson has been residing until very recently with her daughter, Mrs. Matt Leggat, of 512 Rideau road, but had gone to spend a few days with her other daughter, residing in Sunnyside. In view of her advanced age the accident is regarded as serious.

LAWN SOCIAL

The Irma Rebekah Lodge No. 87 I. O. O. F. are holding a lawn social at Mr. and Mrs. Martin Knudson's home on Thursday evening, July 25th. Everybody welcome.—A. L. Fluwell, Secretary.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.

AVONDALE U.F.A. PICNIC JULY 17

AVONDALE U.F.A. AND U.F.W.A.
PICNIC & DANCE, WEDNESDAY, JULY 17th

Avondale U.F.A. and U.F.W.A. are holding a picnic and dance on Wednesday, July 17th. One mile west and three-quarters of a mile north of Passchendale School. Mrs. A. H. Warr, Provisional President of the U.F.W.A., will speak during the day. A line of sports is being arranged.
It is also expected Mrs. Mae Pickel and Mr. Aitken, U.F.W.A. and U.F.A. directors for Battle River will be present. A picnic lunch will be served during the afternoon to which everyone is invited to bring baskets and join in. Orbinale Orchestra will furnish music for a dance in the evening. Everybody come and enjoy the day and night.

ROSEBERRY PICNIC POSTPONED

On account of the Avondale Picnic being held on next Wednesday, the Roseberry Picnic has been postponed one week till July 24th. The picnic will be on the picnic grounds near Roseberry School. Everybody is invited to come and have a good time.

VIKING

The barn on the Leith farm north east of town was destroyed by fire on Tuesday evening last together with practically all contents. Two horses, a pig and some chickens perished in the flames, besides some harness and other goods that were lost in the fire.

Mr. and Mrs. C. A. Dupre motored to Calgary last week. Mrs. Dupre's brother, George Gunmer, was seriously injured near that city while doing some work on the high power line. He was climbing a pole when he was overcome by being too near a high tension wire and fell to the ground, breaking a leg and bruising himself considerably. He was also severely shocked by the current of electricity that "jumped" from the wire a few feet away and burned his forehead and face. He is getting along as well as can be expected.

The Elks hall is practically ready for the plasterers. The exterior is also prepared for the stucco finish. Mr. Lewis, of Wainwright, is busy with the electric wiring. It won't be long now until this community will have a hall that will compare favorably with any in this part of the province.

Mrs. H. P. Hafsdahl and four children, Judith, Evelyn, Ida and Leslie, and Mrs. Magnusson and grandson Robert, left on Monday evening for Dundas, Minnesota, to join Mr. Hafsdahl who is manager of a creamery at that place. The community joins in wishing them every success in their new home.

Mr. and Mrs. H. M. Hilliker and son Chrysler left for Banff on Tuesday morning by motor. They will also spend a few days at Stettler. Before returning they may return to Edmonton and board the train there for Jasper Park for an outing and sight-seeing trip.

Mrs. Green and son Bobbie, Mrs. Thunell, the Misses Rowena Harris and Irene O'Leary left on Sunday for Calgary where they will visit with Mr. and Mrs. Darrel Woodcock and also take in the Calgary stampede. Mrs. Green will spend a few days at Banff before returning.

Albert A. Hansvold and son Melvin, and Miss Olive Meldahl of Grafton, North Dakota, were visitors at the home of Mr. and Mrs. A. Toverud last week. They made the trip by auto coming by the way of Calgary and Banff where they saw some of Canada's wonderland. They also had a visit to Edmonton together with Mr. Toverud before they returned to North Dakota.

Mr. and Mrs. Lee Harvey arrived by motor from Los Angeles Sunday and are enjoying holiday in this community. Mrs. Harvey is a sister of Steve, Percy and Evan Jones. Lee will be remembered as the star pitcher for the local team some ten years ago, and as a good 100 yard sprinter.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES

The Services next Sunday will be at Ross, Alma Mater, Roseberry and Irma at the usual hours.

Last Monday, July 8th; the Presbytery of Wainwright convened here for the purpose of inducing Rev. J. R. Geeson, M. A. B.D. The service, a most impressive one, was conducted by Rev. Mr. McPherson of Holden and the speakers were Rev. W. J. Lohb of Ryley, who addressed the minister, and Rev. T. J. Gordon, B. A. of To-field who addressed the Congregation. There was a very good attendance, all country points being represented. After the service, the Ladies' Aid served a delightful lunch.

ANGELICAN CHURCH PICNIC

A picnic will be held at Steffanson's Lake on Wednesday, July 31st. All those who are interested are cordially invited to attend and the ladies are asked to bring baskets.

Those in and near town will leave for the lake at 1:30 p.m. and will reach the lake about 2 p.m. There will be sports for the children.

SUNDAY? JULY 14th

There will be the usual Anglican Sunday School service in the Masonic Hall at 11 a.m.

A. M. Trendell, Vicar Wainwright

NOTICE

The regular meeting of the W. M. S. will be withdrawn this month on account of so many of the officers being away on their holidays.

Women's Institute Column

The Irma Institute will hold a short sewing course, July 24 to 26. It will be from 10 A. M. to 12 o'clock and 3 hours in the afternoon. It will be held in the Irma High School. Anyone wishing to stay for the day can bring their lunch and there will be a stove to make tea. Any one wishing to join the class, is welcome. It is free of charge, but the committee would like their names. The committee are Mrs. J. W. Milburn, Mrs. Ernest Rae and Mrs. S. Mathison.

It will be necessary for each one to supply their own material for garments, also to bring their patterns, if they have any. Anyone wishing to make flowers will have to bring bits of silk and velvet and tissue, and fine wire. Any new beginner is advised to bring cotton material. Miss Mossey will be in charge.

Program

Taking measurements, lecture on cutting, preparing for fitting, basting, seams, French seams, straightening skirt bottom.

Lecture on Modification of commercial patterns, altering of patterns, cutting of dress, basting, fitting, etc.

Demonstration Lecture on seams finishing according to garment and material, making scalloped hems and finishing hems. Lecture on selection of clothing, design and color.

Construction of garment, drafting of collars, renovating of garments and suggestions for making over.

Lecture on elementary facts we should know concerning textiles.

Construction of garments, decorative stitches, and self-trimming devices. Bound bottom holes. Buckles, head tacks, button holes. Buckles, flowers, etc. The Instructor will adapt the schedule to meet the need of the class.

Our next meeting will be Grandmother's day, and all the grandmothers, young and old are invited. It will be held at the home of Mrs. S. Hager on Thursday, August 1st. We will also have a report of the Convention, if possible.

NOT RESPONSIBLE FOR ROADS

The Times has received a number of complaints about the bad condition of the Highway east of Irma, on account of the large number of loose stones that have been dug up by the grader and allowed to remain on the road. If those using this road will communicate with Mr. D. Ritchie, c/o Department of Public Works, Edmonton, who has charge of this road we believe that steps will be taken to have the road put in proper shape.

50TH ANNIVERSARY EDMONTON FAIR

This year's Edmonton Exhibition, to be held July 15 - 20, should be the greatest in the history of the Association, if the present prospect is any criterion. Never before have the manufacturers and merchants been so keen to secure exhibit space, and it has been necessary to construct a new exhibit building, and enlarge the grounds, to provide the necessary accommodation. The big 50th anniversary programme announced by the Manager, Mr. P. W. Abbott, is proving a tremendous drawing card, and visitors to the Edmonton Exhibition this month will find that in every department, the fair excels that of other years.

AGRICULTURAL STATISTICS

Statistics are often considered dry reading and of little interest by many of the general public. An awakening of interest, however, has recently been apparent, particularly on the part of farmers, not only in the West but also in Eastern Canada. More than ever are the farmers appreciating the necessity of having reliable reports on the current agricultural situation in Canada, particularly as a clue to what is likely to happen to prices and marketings in the near future.

Official reports of this kind are, of course, prepared by the Federal and Provincial Governments. At some time or other, everybody has wondered how the Government arrives at the conclusions contained in these reports. In the case of crop and livestock statistics, an annual survey is made. This is carried on by the voluntary aid of the farmers themselves. Just now the Bureau of Statistics of the Dominion Government is engaged in closing up arrangements for the gathering of information on which the crop reports and farm statistics for the current year will be based.

Whether or not such information is accurate and complete depends on how many farmers report and how fully they answer the questions submitted. It is also a fact that if full and complete information is supplied, the official report will give the farmer a fairly accurate picture of the trend of affairs. Every farmer should supply the Government with information showing areas seeded to different crops, numbers of live stock kept and other information that is asked for so that a complete official report of agricultural conditions can be issued. Such individual reports are of course held in the strictest confidence; only the combined totals and trends are given out.

INSTALLATION OF OFFICERS, IRMA REBEKAH LODGE No. 97

At the regular meeting of Irma Rebekah Lodge No. 97 I. O. O. F. on Tuesday, July 9th Sister Dora L. Tate, District Deputy President assisted by the following staff, Sister McDowell, Deputy Marshall, Sister Mathison, Deputy Warden, Sister Fletcher, Deputy Treasurer and Sister Fluwell, Deputy Chaplain, installed the officers for the current term as follows:

Sister Erickson, Jr. P. G.
Sister McMillan, P. G.
Sister E. Knudson, U. G.
Bro. Knudson, Treas.
Sister Mathison, Warden
Sister Ramsey, Conductor
Sister McDowell, R.S.N.G.
Sister Harper, L.S.N.G.
Sister I. C. Knudson, R.S.U.G.
Sister Hasse, L.S.U.G.
Bro. Hedley, O. G.
Bro. McKay, I. G.
Sister Fletcher, Chaplain
Brother McMillan was a visitor from Jewel Rebekah Lodge, Edmonton, and complimented the District Deputy and staff on the very capable manner of installation.

Refreshments followed the ceremony.

Wednesday's storm caused the electric lights to go out for about an hour shortly after the show had commenced in Fieffer's theatre. After telephoning to Wainwright to find out if the lights were likely to be turned on soon Mr. Kiefer refunded the money taken at the door and the patrons were compelled to find their way home in the dark.

NEWS ITEMS FROM KINSALLA

Mr. and Mrs. Lund of Viking celebrated their golden wedding anniversary on Sunday last at the home of their daughter Mrs. Carl Smogard. We understand all the children were present except one daughter in Edmonton and another in the States.

The Misses Evelyn and Edith Corbett are spending the holiday at their home here.

Mr. Jack Stronach who has been teaching at Smoky Lake is spending his holidays at his home here.

Mr. W. L. Ferries spent Sunday in Edmonton, he reports Mrs. Ferries doing as well as can be expected.

Mr. Frank Williams has engaged a first class mechanic in his garage.

Mr. and Mrs. R. L. Eaton spent the week end at Irma.

Masters Harry and Jimmie Batchelor of Fabyan have spent the past week with Mr. and Mrs. William Anderson.

A social evening was held in the United Church on Tuesday evening for Rev. and Mrs. McNeal, when they were presented with an elderdown comforter.

Mrs. James and three children of Ponoka are visiting her sister Mrs. E. C. Williams.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude help. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Spare the Wild Flowers.

Possibly nothing is so much a part of our lives from the cradle to the grave as flowers. Set the infant down amongst wild flowers, and immediately he wants to eat them all. Then the wee toddler arrives with something for "Mama." The chubby little fat will only contain a badly crushed dandelion, but in his eyes it is very precious.

We all remember the schoolroom the morning after the census. No one had done any homework, so our teacher's desk looked like a condensed flower show. The dear lady (may her grave be covered with violet!) tried to look very severe and pretended she could not find her strap. Till Fatty puffed in ten minutes late with a bouquet of seven enormous sunflowers for "teacher." Then she had to laugh, and we roared. She stood the sunflowers in the corner where she had so often stood Fatty, and gave us all double homework, which we all carefully prepared. Next comes the careful selection of flowers for the "only girl" and the sight of the ominous bunch of the other fellow brought. So it goes on all through life; in times of joy, and times of grief, flowers will bring messages of goodwill and hope into our lives.

And how old and young alike welcome the first flowers of Spring, and rejoice in the ever recurring miracle of the tiny seeds developing so rapidly until flowers in all their multi-colored varieties turn the long bleak garden into a thing of beauty, and the unattractive bulb produces blooms of exquisite loveliness.

In isolated parts of Canada's great national parks, and in remote parts of this great Dominion as yet unspoiled by man, wild flowers, as beautiful, so plentiful, and in such variety, that one is filled with rapture when to reverence at the knowledge that so much beauty could be found in one place. It is difficult to realize that there was a time when beautiful flowers grew in profusion all over the park. The thoughtless and excessive gathering of flowers has completely removed many of the most beautiful examples from the easily accessible places where weeds now predominate.

The threatened extinction of the most attractive of our park wild flowers has become a serious problem to the park authorities. The distinction between a flower and a weed is, in a measure, only a question of scarcity or abundance; their desirability depends as a rule on their rarity. The man who could so popularize the dandelion, the stinkweed and the thistle that they would be gathered in preference to the avalanche lily, the columbine and the lady's slipper, would become immensely popular with the park authorities. Unfortunately the gathering of a bouquet of these weeds would create about the same amount of hilarity as the amateur duck hunter proudly displaying his bag of mud hens.

According to the park laws, the man who chops down a lot of beautiful trees merely to hear them crash, and the man who fills his car with wild flowers merely to throw them out withered and useless at the next stop, are, both equally guilty, and both are liable to a heavy fine. While ninety-nine out of every hundred tourists would view with satisfaction the arrest and subsequent punishment of the tree chopper, only one out of the same hundred would not consider the flower waster a victim of oppression were the same treatment meted out to him as to the tree chopper. The reason is that flower picking has become a universal habit, which habit on the part of a selfish or greedy individual becomes a nuisance, depriving others of the enjoyment of the flowers, which he only appreciates in the getting. A striking contrast is the lover of flowers who sparingly and carefully preserves his specimens for reference, or visits the growing flower many times to study its development.

If the tourist would only realize that the unpicked flower will retain its beauty for days and add greatly to the pleasure of many future tourists, while the picked flower only lasts a half-hour or so, when it becomes a sorry wreck and is thrown away in disgust to bring no pleasant memories to anyone!

The tourist traffic has become a great asset to Canada. It is a financial asset of hundreds of millions of dollars annually. But it is more than that—it brings tens of thousands of people from other countries who come to know and love Canada. This intermingling of peoples makes for understanding, goodwill, and world peace. But tourists will not flock to barren, weedy wastes, and unattractive countryside. They come to view and enjoy the beauty that is Canada, the grandeur of its scenery, its lakes and rivers, forests and mountains, and its unspoiled natural beauty.

Every flower uprooted and soon thrown away, every blossom thoughtlessly picked instead of being left to bloom and re-seed itself for next year, is a serious depreciation of that great national asset, and an ultimate enormous loss to Canada.

Think it over the next time you are tempted to pick an armful of lovely wild flowers turning some secluded spot along the highway or in a national park into a place of almost breathless beauty.

Attended Memorial Service

Representatives of the Canadian Government and the British Legion joined with a number of residents and visiting citizens of the United States, in attending a brief memorial service in the American cemetery at Rockwood, England. Hundreds of U.S. soldiers were buried at Rockwood during the great war.

Dust Makes Long Journey

Australian Soil Travelled 2,000 Miles Through Air To New Zealand

One of the most unusual dust journeys on record was that made by many tons of Australian soil which travelled more than 2,000 miles through the air to New Zealand, according to recent reports. The greater part of the journey was over water. In many parts of New Zealand during the first falls, when the dust was brought down by rain, the mixture was referred to as mud rain. Some of it fell on sweaters of players during a football match, so discolored them that it was difficult to pick out the garments of the different teams. Although not the first dust storm to travel from Australia to New Zealand, the deposit was remarkably both for quantity and the area over which it was recorded.

HEALTH REGAINED

Mother and Daughters Restored Through the Use of Dr. Williams' Pink Pills

"Contrary to what my friends once thought, I am not 'flying,'" says Mrs. Norman White, New Canada, N.S., and I give the credit to Dr. Williams' Pink Pills. I had been a sufferer for some years. I was weak and run-down; my heart would palpitate violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did not benefit me. A second doctor was called in, but with no better result. I was told that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. It was impossible for me to praise Dr. Williams' Pink Pills too highly, and I have every young person who may read this will benefit by its experience. You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Model Summer Resort

Alberta Government To Investigate Site Forty Miles West Of Calgary

The Alberta Government has appointed a committee to investigate the proposed model summer resort at Ghost Lake, forty miles west of Calgary on the Bow River. The plan is idealistic in that it provides for summer homes for the working classes for the very poorest of the Calgary Power Company, the Government and Calgary citizens' committee are co-operating in the project which is non-profit making.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their ready effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numerous cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Quite In Favor

A canvasser, approaching a hefty-looking navy, asked him whether he was in favor of returning a certain candidate to Westminster. The navy took his pipe out of his mouth, gazed at the canvasser without enthusiasm, and said, "Yes, it that's where he comes from."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism can be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Using Many Pulpstones

Over half a million dollars worth of pulpstones are used annually in the 90 Canadian pulp mills.

Alberta Town Planning Scheme

Most Progressive Plan To Be Found On the Continent Of North America

The most progressive town planning scheme to be found on the entire continent of North America was that recently established by the province of Alberta. D. L. Seymour, C.E., told the members of the Town Planning Institute of Canada at a meeting in Winnipeg.

The laying out of rural parks, picnic grounds, tourist camps and school grounds, of fair grounds and hospital grounds, has all provided for advice to cities, towns and villages on their planning problems. The board was open to farmers in helping them to lay out homesteads grouping buildings or installing running water. It was a service extending all over the province. Mr. Seymour said.

Wheat Pool Development

Saskatchewan Pool Estimates 175,000,000 Bushels Of Grain Will Be Handled This Season
Combined handlings of wheat and coarse grains by the Saskatchewan Wheat Pool during the 1928-29 crop year will amount to approximately 175,000,000 bushels, according to an estimate presented to delegates in attendance at the semi-annual meeting of the organization at Regina.

A detailed statement showing the handlings by the pool of various kinds of grains during past years, together with an estimate of the total handling for 1928-29, indicate that this season will far surpass former dealings.

A thorough review of the development of the Saskatchewan Wheat Pool elevator system, however, was given in the report of the board. Delegates were presented with a financial statement, showing the capital position of the organization, as to its ability to finance further extensions of the country elevator system.

Largest Gypsum Producer

Nova Scotia is the largest producer of gypsum in Canada followed by New Brunswick, Ontario, Manitoba, and British Columbia.

Keep Minard's Liniment in the Medicine chest.

South Africa produces 90 per cent. of the world's diamonds.

British Preferential Treatment

Increasing Trade Is Shown With 29 British Countries

Since 1921 there has been an increase of nine British countries which enjoy customs tariff preferential treatment, while in the same period the number of foreign countries to enter into mutual compacts in this connection rose from 14 to 43. This is shown in a return tabled in the House of Commons, in which it is also noted that in the fiscal year 1921-22 Canada exported to the 29 British countries enjoying preferential rates \$317,585,952 worth of commodities while in the fiscal year 1928-29 this had increased to the 29 British countries to \$503,561,623.

Start Education Campaign

W.C.T.U. Will Discuss In Sunday Schools Effects Of Alcohol As A Beverage

A national education campaign through the Sunday schools of the Dominion as to the nature and effects of alcohol as a beverage will be conducted by the Women's Christian Temperance Union. It was decided at the third session of the Dominion convention of the union, Mrs. Gordon Wright, London, Ont., was elected president for the next two years, and Mrs. Louise McKinney, Carleton Place, Ont., was elected president. Mrs. T. H. Wright, Hazelton, B.C., was chosen national secretary and Mrs. James Mahon, Montreal, national treasurer.

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is again established again. Hundreds of testimonials received annually prove its effectiveness.

Photographing Canada

During the 1928 season, 92,000 photographs were taken from the air for the use of Dominion Government Services. Copies of these were filed in the office of the Topographical Survey, Department of the Interior. The complete file at the present time contains 251,000 individual prints.

Minard's Liniment for Rheumatism

The Concrete Products Company of Regina, have leased a site from the Canadian Pacific Railway on Twelfth Avenue, East Calgary, and a plant which will be used for the manufacture of concrete pipe, culvert and building blocks, is already under construction.

"You ain't in love is you, Andy?"
"Yes, Ah is in love all right—but she can't get no job."

The River Jordan wanders 220 miles in covering 60.

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."
Evelyn Beaupre, 132 Alma Street, Montreal, New Brunswick.

Manufacturing In The West

Value Of Production In Three Prairie Provinces Reaches Large Figure

Reporting for the prairie division of the Canadian Manufacturers' Association, H. B. Lyall, of Winnipeg, said at the convention at Halifax, that the value of the products of manufacturing industries in Manitoba, Saskatchewan and Alberta, in 1928, exceeded \$325,000,000. Two major developments noted by Mr. Lyall were the utilization of the mineral wealth of Northern Manitoba, and the development of the Alberta oil resources.

"What are you studying, John?" asked Aunt Maria.

"Economics."
"I don't see no use in studying that stuff. If it's forced on you, you gotta practice it."

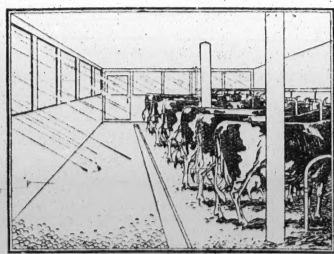

Fishermen

Take Minard's along to relieve irritation of mosquito bites. Also good for cuts and bruises.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light run through windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs. While a square yard of glass of ordinary thickness weighs about 155 to 160 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

Railway Commissioners Asked To Supply Information Regarding Cost Of Hauling Alberta Coal

On behalf of the provinces of Ontario and Alberta, application has been made to the board of railway commissioners for submission by the two transcontinental railways of figures showing the "cost of pocket cost" per ton of hauling Alberta coal to Ontario in 1928. Acting for the two provinces, J. Earl Lawson, M.P. of Toronto, Ont., has asked that the information be supplied to the board and a rate fixed for a public hearing.

In his application to the board of railway commissioners, Mr. Lawson contends the fundamental reason for fixing the temporary freight rate of \$6.55 a ton, from Alberta to Ontario, during the slack season, for a three-year period, was to determine after experiment what would be a fair rate for hauling the coal. He takes the stand, for the province, that the first essential is to learn the actual cost of transportation.

The provinces point out an order-in-council was passed in 1928 directing the railways to accept Alberta coal for shipment to Ontario at the temporary rate of \$6.55 a ton, under supervision of the board of railway commissioners. Under this arrangement Alberta coal was brought into eastern Canada last winter.

The provinces allege the coal statements already submitted to the board ignore the "cost of pocket cost" and that a relatively higher rate is assigned to coal than the average rate of all traffic moved.

Growing Grapes In West

Grapes and Other Garden Crops Suitable For the Prairies

Native grapes bear bountiful crops of fruit in the province of Manitoba. A large collection of plants brought together at the Morden experimental station are thriving well under cultivation. The seedlings of those that are bearing are being carefully examined from year to year and those that bear the larger and better class of fruit are being selected for their use as a hardy fruit for jelly making and as foundation stock for cross-breeding with good commercial grapes which are lacking in hardiness. In his report of the station for last year, Mr. W. R. Leslie, the superintendent, states that some of the commercial varieties are bearing well. Campbell's Early, a grape of high quality gave a very heavy crop, but owing to the coolness of the season it did not ripen all of the fruit. Other varieties, such as Beta, Alpha, and Suelter produced crops that matured satisfactorily. This grape, but one of the many fruits being worked with at the Morden station. Cherries, strawberries, raspberries, currants, and Saskatoons are all receiving attention with most interesting results that are recorded in the report, which is obtainable from the Publications Branch of the Department of Agriculture at Ottawa. Garden vegetables are also receiving special attention. It is encouraging to learn in this report that the citizens of the Prairie Provinces need lack practically nothing in vegetables that are grown with success in other parts of Canada.

An Extraordinary Forest

The most extraordinary forest in the world occupies a tableland six miles in width near the West Coast of Africa. Although the trunks of the trees are as much as 4 feet in diameter, they attain the height of only one foot. No tree bears more than two leaves, which attain a length of 6 feet and a breadth of 2 feet.

Old Gentleman: "How lucky these modern young women are to be able to wear such thin and scanty dresses!"
Young Woman: "At last, Egon has sent me that heavy fur coat, but it is too warm to wear it today."
Der Lustige Sachse, Leipzig.

To Try Northern Flight To Europe

Route Will Be Via Hudson Bay and Greenland To England

Two Saskatchewan financial men and a newspaper representative are leaving Winnipeg over the Canadian National Railways for Windsor, Ont., on their way to Wayne, Mich., where they will purchase an airplane in which a flight will be attempted this summer from Saskatoon, Sask., to London, England. The route of the proposed flight will be via the Hudson Bay, Hudson Straits to Greenland and Iceland and thence to England. The pilot of the plane will be Captain J. E. Home-Hay, D.F.C., M.D.

The party includes Charles Ellis, president of the United Air Services of Saskatchewan; H. P. Hartley of the same company, and W. R. Clarke, well known Canadian newspaper man and present news editor of the Saskatoon Star-Phoenix. They will be joined in eastern Canada by Captain Home-Hay, who is chief pilot for the United Air Services of Saskatchewan and he will fly the party back to Saskatoon.

Once the plane is landed in Western Canada, it will be groomed for the trans-Atlantic flight, a start on which will be made as soon as the condition of the plane and weather reports warrant it. The city and Board of Trade of Saskatoon are sponsoring the adventure.

Device To Determine Quality Of Tomatoes

Simple Invention Determines Ripeness Of Fruit From Color

Using the principle of a nursery toy—the familiar rotating, colored disks that blend into single shades—Dr. John H. MacGillivray, of Purdue University, Indiana, has devised an apparatus to aid farmers in determining the ripeness and color of tomatoes. By altering the ratio of the exposed areas of the different colored disks, he is able to produce all shades in which tomatoes appear, and, by comparison, to classify the fruit accurately as to ripeness.

The disk, spun by a small electric motor, is placed beside the fruit, and the colors altered until the exact matching shade is discovered, explains Popular Science Monthly. Fully ripe tomatoes have been found to have practically the same color no matter from what section of the country they come. With the MacGillivray device it is hoped to establish a standard that will result in better grades of canned and fresh tomatoes for public consumption.

New Industry For B.C.

Company Organized At Armstrong Will Manufacture Alfalfa Meal

Under the title of the British Columbia Alfalfa Products, Ltd., a company has been organized at Armstrong, B.C., for the purpose of manufacturing alfalfa meal, for which there is a large demand at the coast for feed for cattle and other livestock, and which is at present entirely imported from the United States. Cheap power will be available from the Shuswap hydroelectric which will be operating next month and the railway companies have promised favorable rates. The necessary machinery is now on the way and should be up in time for this season's second crop of alfalfa which is most suitable for the manufacture of meal.

Cheap Power

Rates Charged In Ontario Said To Be Cheaper In North America

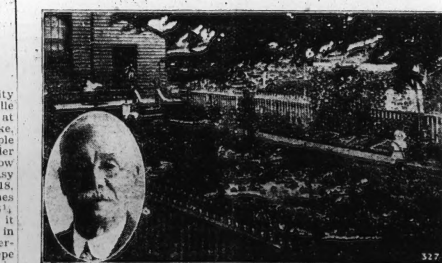

Electric power rates charged by the Ontario Hydro Electric Power Commission are already the lowest in North America, but there is a possibility of putting them on a still cheaper basis, according to an announcement of the chairman of the commission. The annual statement of this publicly-owned organization, recently issued, discloses a net surplus of \$2,016,451 last year.

Good Market For Holsteins

Since the beginning of January more than fifteen hundred head of pure bred Holstein cattle have been exported to the United States, according to the Holstein-Friesian Association of Canada, which points out that recently sales have been bringing prices much higher than prevailed some time ago, indicating a general upward trend in the market for good Holsteins.

Student inspecting Chalk's latest drawings: "Your husband seems to have wonderful imagination!"
Mrs. Chalk: "Yes, indeed he often gets the idea that he's the head of the house."

Making the Railway Beautiful

1.—John Caesar, pioneer of Canadian Pacific Station Gardens.
2.—First Canadian Pacific Station Garden at Markdale, Ont., 1904.

John Caesar, like his great prototype, "came, saw and conquered." When he first started as station agent at Markdale, Ont., back in 1881, it was just a station with the rails running past it. He decided that passengers should sit up and take notice when they passed through his territory, so he started in to landscape garden it. Soon he had a beauty spot where before there had been little to interest the traveller. Canadian Pacific Officials were quick to recognize the value of the work and the Floral Department of the railway was formed. Mr. Caesar was chosen to look after the beautification of the road and he has to his credit a large number of stations throughout Ontario, Quebec, New Brunswick, and Maine. Since 1873 Mr. Caesar has been drawing pay cheques from railways and possibly has signed more than any other living railroad man. When he retired in 1917 on his agent's pension, he went on to work at landscape gardening and has literally created hundreds of station gardens, some of them real showplaces. "I have received new life from the soil," he says, in replies to compliments on his fresh complexion and alert manner, for he is a man well in the seventies, and he hopes to remain many more garden before he completes his life span.

Ripens In Ninety Days

New Variety Of Corn Developed In Wisconsin Dodges Frost

Cold, damp springs and early killing frosts—the extremes of short summers have been outwitted by Wisconsin crop experimenters who have developed a new variety of corn that ripens in a scant three months.

By avoiding the perversities of weather, the new strain is hailed as a distinct contribution to crop improvement work and seems likely to win a place among the seeds and grains used by farmers of Northern Wisconsin and in States of a similar latitude.

In these sections, where the summers are short, farmers have found it difficult to grow corn that would mature before frost, so that it could be shelled and used for feeding poultry and swine. The new strain, called Golden Chippewa because of its golden yellow color, is a flint corn, and will yield forty to sixty bushels of shelled corn. It can be planted about June 1 and will mature in ninety days.

E. J. Delbridge, superintendent of the branch experiment stations at Sturgeon Bay and Ashland, developed the new variety. A small quantity of the seed is ready for distribution this season, and in another season or so he believes there will be sufficient to meet the needs of the farmers in the northern regions.

Meat Supply Safeguarded

Abattoir Operated Under Provisions Of Meat and Canned Goods Act

Practically all of the meats sold in the better shops of Canada come from abattoirs operated under the provisions of "The Meat and Canned Goods Act," administered by the Department of Agriculture, at Ottawa. There are approximately sixty of these abattoirs, the majority of them being in full operation throughout the year. These establishments, erected and equipped so as to ensure the utmost in sanitation, are each provided with a staff of federal inspectors who see to it that only healthy animals are used and thoroughly and most turned out. During the past fiscal year there were slaughtered in these abattoirs 1,108,835 cattle, 2,433,704 hogs, and 619,994 sheep.

By Wireless

A dramatic story of how wireless played the major part in the treatment of a fractured elbow and a poisoned wound was recently told by radio authorities at Ottawa. G. Hudson, wireless operator at Hope's Advance, was visited by an injured fur trader. He wirelessed Ottawa, and the operator there secured medical advice and radioed it back to Hudson who treated the trader.

We'll Visit America

Premier Ramsay MacDonald denying reports he had abandoned his intention of visiting America, indicated that there was no question in his mind that he would make the trip. "It is just a question of when I shall go," he said. "I believe that a tremendous amount of good work could be done with a visit to the United States."

Reporting Highway Accidents To Be Discussed At Convention Of Canadian Good Roads Association

Ornamental Shrubbery

Lasts Of Shrubs That Carry Colored Fruits Throughout Winter Months

Many homes in the Prairie Provinces are brilliant with flowering shrubbery at this season of the year. At the experimental station at Morden, Manitoba, many varieties of shrubs as well as herbaceous plants are being cultivated to ascertain their usefulness in the adornment of public parks and private gardens. The lawns of the station are a source of pleasure to the visiting public throughout most of the season, beginning with the opening bloom of that sweetly fragrant small shrub, Daphne genkwa, and of the humble but dainty blue flowers of the hardy herbaceous holly, Scilla sibirica, until cold weather in autumn causes visits to cease. Indeed the grounds of this station present attractive features throughout the year. Mr. W. R. Leslie, the superintendent of the station, in his report for last year names a number of woody plants that carry colored fruits throughout the whole winter. Among these are the Russian Sandbarb, Native Buffalo, Cherry, Cotoneaster, Siberian Crab, Mountain Ash, Sumach, Japanese Amelanchier, and False Bittersweet. Examples of other shrubs that lend colour in early winter with their distinctive berries and fruits are given in the report as Red Elder, Snowberry, Mahoe, Winter Berry or Native Holly, Japanese Barberry, and Cherry, Siberian Almonds, Hope, Clematis, Rugosa Olive, Grapes, and Virginia Creeper. Other plants enhance the winter landscapes with their yellow, red, or purplish berries. Lilies, Chervil, Birch, Silver Birch, Hazels, Elders, and a number of other kinds of shrubs that are hardy and easily grown.

How To Judge Music

Scottish Major Says When Skin Creeps Music Is Good

A new way of testing the impression made by music is reported from a city in Scotland. There had been a brass band contest, and the mayor in awarding prizes made the following explanation: "I am no judge of music; but when the skin creeps you know you are enjoying yourself, and that was my sensation this afternoon."

This is getting the matter down to what used to be called the physical basis of life. Anyhow a crawling sensation down the back of your neck, if it was not made by a stray insect, is better than having a musical, like the Fat Boy, make your flesh creep.

This Scottish verdict recalls the story of Charles Darwin when he was a student at the university, leaning over the wall and listening to the organ in the church and asking his boy companion, "Don't you feel a chill running down your spine?" This sensitiveness may not have indicated the highest appreciation of the music, but it was the cause of regret to Darwin in later years that he had lost it. His intense concentration on scientific studies had dulled and at last almost destroyed his capacity for certain kinds of esthetic emotion. — New York Times.

Amazed By Growth Of Coast Cities

Admiral Comments On Progress Of Vancouver and Victoria

In three decades British Columbia has achieved remarkable progress in moulding a young country into one of the best known areas of the world, in the opinion of Admiral Gough-Calthorpe, R.N., retired, who has visited Vancouver after an absence of 30 years from Canada. Admiral Gough-Calthorpe, on a round-the-world cruise from England, was in charge 30 years ago of the Pacific naval training base then at Victoria. He was imperious of the squadron flagship. Later after leaving Canadian waters he was admiral of the Mediterranean fleet.

Renewing his friendship with Canada and Canadians after such a long absence, the admiral said he was gratified and astounded at the growth of Vancouver and Victoria, particularly with regard to shipping.

"Isn't it disgusting to see people eating peanuts in public?"
"I'll say it is—have you any gum?"

Taste is not necessarily following the fashion

The question of the compulsory reporting of highway accidents will claim much attention at the convention of the Canadian Good Roads Association, which is to be held in Charlottetown, P.E.I., on September 17, 18, and 19 next. This problem has often been discussed at various meetings, but heretofore little progress has been made because of the lack of fundamental facts upon which to base an intelligent discussion.

In March of last year the Province of Quebec put on its statute books a law requiring that every accident on the highway be reported. The results of ten months' operation of this law have been compiled under the direction of Mr. J. Bégin, the Comptroller of Provincial Revenue for Quebec, and summaries are being sent members of the Canadian Good Roads Association for their study.

The main objects, said Mr. Bégin, are: (1) To ascertain the principal causes of accidents and legislative against them. (2) To find out the drivers causing most accidents and prevent them from driving by suspending or cancelling their driving licenses. (3) To find out the places where obstructions to a clear view have caused accidents.

We required a number of persons to report accidents as follows: The owner, chauffeur or operator of a motor vehicle; the police officer who had knowledge of the accident or who was informed of it; the insurer who was notified of the accident; the tramway or railway company, in case of a collision of their cars.

While all these were to report, we devised a simple system to prevent a duplication of the figures, and in this connection I might say that last year we had 7,462 reports on 5,865 accidents. All the compilation was done by no more than four employees. We required the reports to give date, details about vehicle involved, place, particulars on the place, obstruction, probable cause of accident, damage and so on.

"We found out some extraordinary facts. For instance, in Quebec the proportion of automobile accidents to automobile registrations is 3.90 per cent, or one accident to each 25 motor cars. The negligence of the driver is the cause of 54.85 per cent of our accidents. Not less than 52.62 per cent of our accidents occurred in intersections, and 47.20 per cent, at other places on the highways or streets. The bad habit of passing the car ahead without having a clear view was the cause of 8.53 per cent of our accidents. Peculiar as it may seem, very few accidents were caused by obstruction to the view of the driver, because drivers are usually careful where a clear view cannot be obtained at intersections and other places.

After our one year's experience, we are well satisfied with our law. However, I should point out that we have been careful not to clutter up our files with too much information. We have a printed form of report which covers only the essential points.

May Try Grand Canyon

Bill Williams, the man who pushed a peanut up Pike's Peak, is looking for new fields to conquer, and he has his eyes focussed on the Grand Canyon. He gave out the following statistics after ending his 21-day derby: peanuts, 3,000 out; 1,841; average business per peanut, 1,432; liniment used on aching joints and muscles, nine bottles.

Lady: You're the oldest inhabitant of the village, I suppose?
Ancient: Yes I be, mum, but mind yer, I ain't always been.

London is the greatest port in the world, judged by any standard.

"Children, what are you doing?"
"We are playing at aeronaics, and can't get the propeller to sound right."
Nagels Lustige Welt, Berlin.

WEED IDENTIFICATION, ERADICATION & CO-OPERATION ARE WEED INSPECTOR'S PROBLEMS

The first thing in my mind is to be able to identify weeds and then to eradicate them one must know their habits, how they spread, and how to kill them. Weeds differ greatly, they have different habits and growth, and for that reason we have different methods of eradication and to simplify this I will give these weeds in four classes. Annuals, Winter-Annuals, Biennials and Perennials. The Annuals germinate in the spring, grow during the summer and mature seed all in the one season, then the plant dies. Winter Annuals germinate in the fall, live through the winter and complete their growth the next summer and mature seeds and then the plant dies. Biennials require two years to complete their growth. They germinate the first year and flower the second year and produce the seed and then die.

Perennials live more than two years each year new tops spring up from the roots and spread very fast both from root and seed, and are therefore very hard to eradicate. The worst of the Perennials are the Sow Thistle, Canada Thistle, Couch Grass, Blue Lettuce. The Sow Thistle is a Class A weed, the others in Class B.

To Eradicate Annuals
First of all use clean seed.
Second, winter horses should be fed nothing but clean feed free from all weed seeds, or better to grind all grain fed.

Do not allow stock to roam from a dirty field to a clean field and be sure that all machines and racks are cleaned before going from one field to another, and then burn all weed seeds that are left on the ground after threshing. Now as to Annuals, they should be allowed to sprout and grow about two or three inches and the best way to do this is to cultivate early in the fall, not plow, and the weeds will be able to get an early start in the spring and when up two or three inches, cultivate again until all seems to be destroyed, then plow about four or five inches deep and harrow and allow all weeds to grow again and repeat the cultivation during the summer and do not plow till after you have taken a crop off this. Do not cultivate too often, allow them to grow some.

Now the Perennials are handled in a different way entirely. First plow after harvest and leave the land rough, then as soon after the middle of May and before the first of June cultivate crossways and then lengthways with a duck foot cultivator and then once each week during the rest of the summer unless wet weather should make the land sticky, in which case do not touch it till it is dry enough to work. Then in the fall plow again and leave it rough and in the spring if this is cultivated once each way thoroughly it could be sown to grain, but must be watched closely as a few stray plants are likely to show up. These could be dug out or a chemical used on them a couple of times will destroy them. As for small patches in the fields or other places, I would advise digging out all plants and roots or using a chemical on them but see that all leaves are sprayed and repeat in five to seven days again. This I find is giving good results.

Perennial Sow Thistle has so established itself in Manitoba that it is entirely changing the character of farming in that part of the province where it has a good foothold. I will quote you a letter from Mr. James Richardson of Richardson & Sons grain merchants of Winnipeg, Man.

He says, "I bought two farms close to my own very cheaply because the owners were practically willing to abandon them on account of sow thistle. I bought these farms partly to save my own farm and partly to see if I could clean them up, but it has cost me more than the farms are worth to beat the sow thistle and I still have not beaten the sow thistle. I would advise you and your weed inspectors in Alberta to talk sow thistle continuously, as of all the evils that affect the farmer, such as hail, rust, drought, wet harvest, etc., Per-

PURE BRED CHICKS

Many of the highest record Pure Bred flocks in Western Canada supply us hatching eggs. These flocks are carefully culled and selected and selected. Our Paterisime Electric Incubators ensure large strong chicks. Our Four Hatcheries at Winnipeg, Regina, Saskatoon or Calgary are ready to supply your needs. Order direct from this ad. Immediate delivery. We Guarantee 100 per cent. Live Delivery.

We Don't Grind Valves!

Continually regrinding the worn, warped valves of a crippled motor is like preferring a crutch to a cure — within a short time your car comes limping back again for another grind — and another. It wouldn't be so wasteful if each regrinding held that original "new-Car" power, but it doesn't.

WE DON'T REGRIND VALVES — WE RE-CONDITION BOTH VALVES AND SEATS BY MACHINERY

And What a Difference!

Ask any of our customers, or better still, come in yourself and have your valves inspected carefully and properly.

TWO GOLF LEADERS

Western Canada is very much in the golfing limelight this year with both the Canadian Amateur and Western Canada Amateur Championships being played over the Jasper Park Lodge course, Jasper National Park, Alberta, August 19-24, inclusive. Much organization has been necessary to make sure of the success of these tournaments and none have worked harder than C. E. Harvey, of Winnipeg, president of the Royal Canadian Golf Association (left), and C. W. Jackson, of Winnipeg, president of the Western Canada Golf Association.

THE "LISLE" IS GUARANTEED TO BE The Most Accurate Valve Re-facing Machine

ON THE MARKET.

To Our Customers and Others:—

We take pleasure in announcing that we have recently installed in our repair shop a Lisle Cup Wheel Re-facing Machine, and a complete set of valve re-seating cutters and are now fully equipped to do a scientifically perfect and accurate valve job for you.

This method of doing valve work is endorsed by automotive engineers, as being the only way in which to obtain a perfect gasoline tight joint, which will give your motor the power, pep and mileage it should have.

As we are always endeavoring to be up-to-date, so we can give you the very best of service and workmanship, we have gone to great expense in installing this equipment and believe that our efforts will be appreciated by you.

If your car, truck or tractor jerks and snorts, lacks pick-up and power and acts like it is trying to climb a mountain when you are only trying to navigate a small hill — and you are getting tired of feeding it an overdose of gasoline — it needs a valve job — that's all! Bring it to us and let us do a valve job with this wonderful machine and we absolutely guarantee to remedy the trouble or gladly refund your money.

We invite you to drop in the next time you are around this way and let us demonstrate this machine, and explain to you the importance of having your valves properly seated.

Yours for better service and workmanship.

BRUCE STAMPEDE FRIDAY, JULY 26TH

(From Viking News)

The genial Henry Owens, prominent citizen of Bruce, and erstwhile secretary of the Bruce Stampede, was in town last week and left an order for posters for the Bruce Sports and Stampede which will be held at the stampede grounds just east of Bruce on Friday, July 26th. These posters have been delivered and are being scattered to all parts of the province telling of the events that will thrill the thousands that annually flock to that scenic and colorful rodeo.

It is a well known fact that the Bruce stampedes have been very successful for many years past. Each year sees larger crowds than ever gathered round the enclosure where Cow girls and cow boys make whoopee and wild broncos and steers give these he-men the ride of their lives.

A purse of \$200.00 has been hung up for harness races alone. Besides this there will be running races, tandem races, novelty races, pony, roman potato and Shetland pony races.

The best bucking bronco rider will receive fifty dollars and twenty five dollars goes to the best bucking horse. Wild cow milking and steer riding, and many other events will round out a real stampede program such as only the west can put on.

Added attractions are the Vegreville Elks band, basketball games, horseshoe tournament, and children's sports, feats of strength and daring by J. A. Marshall, the strong man, and a grand ball at night.

Head your car for Bruce July 26th and let 'er buck.

Excitement reigned here Monday evening when it was learned that an aeroplane was racing the Confederation to Viking. It happened that Mr. Seybold, service manager for the Graham-Paige Auto Corporation who was on his way back to Detroit after visiting the Edmonton branch missed the train by a few minutes. Mr. Jack Starkey, the Edmonton branch manager, came to the rescue and secured Wop May and his aeroplane to carry Mr. Seybold to Viking where the Confederation had a scheduled stop. Leaving Edmonton only forty five minutes before the train was due at Viking, the plane soared away following the C. N. R. tracks at a 100 mile an hour pace. The train was passed at Torlea and from then on into Viking the plane had it all over the train for speed as it dropped gently down in Maguire's field south of the station and Mr. Seybold was standing on the platform waiting when the train pulled in. The plane was away again as soon as the train and chased it for a mile as a farewell salute and then was soon lost to sight as it winged its way back to the city. It was a good demonstration what a good pilot and aeroplane can do in an emergency.

Reports are current locally that an extensive oil drilling program is being started in the Rodino district some twenty miles northeast of town. Pits for two rigs and material for the derricks are reported on the grounds. We will have an oil field here yet, in spite of anybody who says there is no oil in the Viking district. Oil has been struck in several of the local wells, and why rumors should persist that there is no oil is a mystery to those who know there is. We would like to see a real test well go down before the curtain is rung down on local oil activities. Maybe you'd be surprised.

A party bent on seeing the Peace River country in all its glory, consisting of Messrs. Ole Benson, J. E. Kringen, Hans Hanson, P. Nyhus, and Thomas Berg, Jr. spent the first part of this month in their cars sight-seeing and looking over what has become the most famous part of Alberta, (outside of Viking), and that is the Peace River country.

Leaving here in two cars they hit the trail for the town on the Peace named after the great river. Then on they sped over good roads as far as Valhalla and into the Pouce Coupe country where homesteads are still available and ox teams are a common sight. They were delighted with many aspects of the country; it was beautiful, it was big, it was good — but no country is good without rain, and they came to the conclusion that that part of Alberta in a dry year, could yield no better than this district.

The board walks on Main street south were taken up just before the big rain on Friday, and citizens were hop, skipping and jumping to the dry spots and pieces of plank strewn here and there. They didn't seem to mind it however, as there hasn't been enough mud this year anywhere to kick about. Let's have more mud — if it helps the crops along.

WORLD HAPPENINGS
BRIEFLY TOLD

Director Bauerle of the Zeppelin works has gone to Tokyo to prepare for the arrival of the Graf Zeppelin on its cruise around the world.

A participant in both Kiel rebellions, George Buchanan, 82, who came to the West as a member of the Red River expedition under Sir Garnett Wolseley, is dead at his home in Winnipeg.

England and Wales have decreased in population by 44,112 persons in the first quarter of this year when compared to an increase of 23,611 persons for the same period in 1928. Is causing some alarm.

Hon. Mr. Justice Riddell, Toronto, was elected president of the Canadian Social Hygiene Council at the annual meeting in Montreal. Judge Emily Murphy, Edmonton, and Dr. H. E. Young, Victoria, B.C., were appointed vice-presidents.

The great appeal flying for the university student resulted in the department of national defence receiving more applications for its course at Camp Borden than it has facilities to accommodate. The new class will have forty students.

Prof. C. Macintosh, a native of Canada and professor of theology in Yale Divinity School, who would not promise to defend the United States against all enemies, was denied American citizenship by Federal Judge Warren.

Frank G. J. McDonald, of Toronto, was elected president of the Canadian Pensioners' Association at the fourth annual meeting of the association there. A large increase in membership was reported from Ontario and British Columbia.

Arthur Thomas, 19-year-old, caught up in the Grandview branch of the Royal Bank of Canada at Vancouver, escaping with some four thousand dollars, was sentenced in police court today by Magistrate H. C. Shaw to five years in the penitentiary and ten lashes.

If the organized system of cattle rustling by truck is not checked immediately, Saskatchewan, Idaho and stockmen of the entire west will be great losers, according to delegates in attendance at the seventh annual convention of the Saskatchewan Stock Growers' Association, at Swift Current.

Plans To Canoe Down the Fraser

Young German Journalist To Commence Adventurous Canoe Trip

In the track of the great explorers of the first white men to lay eyes on the Pacific coast a young German journalist is about to start an adventurous canoe journey down the Fraser and the Thompson Rivers to Vancouver. Arriving in Jasper from Edmonton where he took a preliminary canoe trip on the Saskatchewan River, Carl Scherler, of Munich, will leave for Mount Robson. He will take to the water at Blue River, returning to Jasper by train. Scherler plans to explore the Athabasca and Maligne Lake. The young adventurer, who has written a number of books on outdoor subjects, is also a lecturer of prominence in Germany both by radio and from the platform and has written and produced movie scenarios of river and lake travel. By movie and still photograph and by the written and the spoken word, he will carry Canada's story to Europe. His canoe is a folding one weighing only 35 pounds and easily carried on a man's back and is modelled after the Eskimo kayaks.

Mexican Jumping Bean

The Mexican jumping bean does so because of a little worm inside which coils itself and lets itself go like a catapult, carrying its house along with it. The worm lives in the bean all the time, and if a hole is made in the shell, it fills it up again.

Insurance Agent — "Under this policy you can't commit suicide within one year."

Prospective Victim — "I don't believe my wife would let me take it."

"Mother, what a lot of lipstick that animal must use." Lustige Koller Zeitung, Cologne.

Canadian Amateur
Golf Championship

Entries Restricted To Players With Handicaps Of Ten and Over August 1

Entries for the Canadian Amateur Golf Championship to be played over the Jasper Park Lodge Course, Jasper, Alberta, August 19 to 24, will close on August 1, according to announcement made by C. E. Harvey, president of the R.C.G.A. Positively no entries will be accepted after that date. Mr. Harvey said, and it will be necessary for those desiring to play to have their entries in the hands of R. L. Anderson, secretary of the R.C.G.A., Hamilton, Ont., before August 1.

Players entering the Canadian championship must have a certified handicap of ten or less. Figuring on this basis, it is believed that about ten players will take part in the qualifying round of the major event. Entries for August, the figures being arrived at as follows: Eastern Canada, 20; Manitoba, 15; Saskatchewan, 10; Alberta, 20; British Columbia, 20; and the United States, 15.

A much larger entry is expected for the Western Canada Amateur Championship which will be played over the Jasper course at the same time. This event is open to players with a registered handicap of 16 or less. Entries for this event should be in the hands of James MacKenzie, Winnipeg, secretary of the Western Canada Golf Association, not later than August 14, though in special circumstances post entries will be accepted at Jasper.

TYPICALLY SPORTS

A new featherweight tweed in smart wood-violet tones with neckline softened by full silk crepe rever collar with flatterer jabot trim and vest. The skirt shows the fashionable all-around box-plaids, and is stitched to hipstyle which is joined to bodice under the narrow belt. Style No. 482 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It will make up very attractively too in plain silk crepe in vivid red, wool jersey in almond green with matching full silk crepe, grey silk crepe with matching shade in linen, printed rajah silk and printed pique in red and white tones with plain matching red linen. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

The Captain — "I hear you arrested Buffalo Mike and then let him go."

The Patrolman — "That's not so. I had the wrong man. He showed me conclusively that he wasn't from Buffalo. He'd just come from Troy."

WHERE WHITE MEN LIVE

This little Red Cross Outpost at Pouce Coupe, in the Far North, is the pride of the Province of Alberta. Situated 89 miles north-west of Edmonton, it is 89 miles from the end of steel.

Formerly the buffalo and Indian land here, but today the Pale faces are establishing themselves in splendid settlements, forging ahead with a type of civilization that does honour to the pioneer "Pilgrim Fathers" of their ancestry.

Thanks to the Red Cross vision and extension service, this district is no longer a place where Red men live, but where "White Men Live." The beneficent arms of the Greatest Mother embraces six settlements in an area of three hundred miles.

Holds Important Office

Britain's First Woman Cabinet Minister Well Fitted For Position

Miss Margaret Bondfield has been given an important office in the Labour Government. She is Minister of Labour and the first woman to hold Cabinet rank in any British administration. She is also a member of the Privy Council.

Miss Bondfield is a former president of the Trades Union Congress and she was one of the prominent personalities at Washington when the International Labor Conference was held there.

A valuable report on child migration to Canada was produced by Miss Bondfield in 1924, when she was parliamentary secretary of the department she now heads.

Once, when bidding farewell to a party of domestics going to Australia, Miss Bondfield told them the mistress of the house had a right to expect a "good, honest day's work."

The appointment to Cabinet rank of Miss Margaret Grace Bondfield is of particular interest to Canadians who remember her visit to Canada in January, 1927.

She was first elected to Parliament by Northampton, which she represented in 1923-24. She has served a thorough apprenticeship for her present Cabinet position, having been parliamentary secretary to the Ministry of Labor in the MacDonald Government in 1924. She was the successful parliamentary candidate in Wallaseid in 1926.

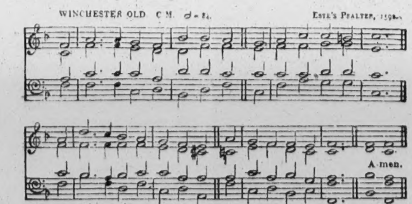

Canada's Newspaper

Canada led all other countries of the world by a wide margin in the production and export of newspaper paper during 1928, according to the figures of the News Print Service Bureau. Dominion production in that year amounted to 2,381,000 tons, this representing one-third of the world's total output, while Canadian exports amounted to 2,207,000 tons, a volume equal to those of all other countries put together.

Weather maps can be transmitted to ships at sea with a new radio sending device invented by a Washington man.

Song of Thanksgiving

The following song, "Gratitude," words by W. E. Dyer, and tune suggested by Dr. F. C. MacMillan, is an emblem song of thanksgiving for returning health to His Majesty the King:

Almighty God—in gratitude
We now approach Thy throne,
And in one voice, though many
tongues,
Thy might, Thy power own.

The East and West, the North and South,
And vision, cottage, field,
Cathedral, church and humble shrine,
Their grateful message yield.

Grant peace in all the Empire,
Lord,
Grant peace throughout the world;
May every people sing Thy praise,
With every flag unfurled, Amen.

Teachers in schools throughout the west may secure copies of this "Hymn of Gratitude" in its original form by writing to the composer, Mr. W. E. Dyer, 4 Fairlawn Avenue, Toronto, and enclosing postage to cover the cost of mailing.

Air Routes For Alberta

Three Are Likely To Be Established Very Shortly

Establishment of three main Alberta air routes by early next year, one leading east from Canmore to Montreal, one north from Edmonton to the Mackenzie River, and one south from either Calgary or Edmonton to Coquiton, on the International border, are the chief probable developments at Ottawa in the near future, emphasized by H. B. Adhead, member for East Calgary, on his return to the city.

The matter of the air mail routes, Mr. Adhead stated, had taken up a considerable amount of time. The question of award of the contract for the East and West route, he said, was still undecided, but, he claimed, the amalgamation of three Western aviation companies into one concern, under the heading of the Great Western Airways, Limited, of Calgary, had simplified matters considerably, and had greatly increased the likelihood of a split in the main contract. "The split, if it takes place," he said, "will make it necessary for one company to operate from the East to Regina, and for another company to operate from Regina to the West."

As soon as the matter of the mail route across the continent as far as Canmore had been decided, he continued, the government would in all probability take up the establishment of routes North and South. These, he pointed out, would converge on Southern Alberta.

By next spring, moreover, Mr. Adhead stated, it was very possible that everything would be ready for establishment of the final link in the Atlantic to Pacific air mail service, the route over the Rockies to Vancouver. Although a recent press notice had implied that this route would be from Edmonton, by way of Jasper Park, Mr. Adhead stated emphatically that no decision on that score had been reached by the government, and that a survey by the Department of Civil Aviation would take place during the summer. A number of Alberta flying men, he mentioned, had stated to him that they favored the route from Calgary via Crow's Nest.

The Vimy Monument

Credited With Being the Finest Of Any In the Battlefields Area

"The Vimy monument is the finest of any in the battle area," declared Hon. Herbert Marler, Canadian envoy to Japan, upon his return to Canada from a European trip. Mr. Marler, who is sailing for Tokyo from Vancouver on August 29, aboard the "Empress of France," was in England and France on business matters and while over there was received by the Prince of Wales. The Prince, said Mr. Marler, showed himself to be well informed on the Canadian conditions and asked a number of questions about the Dominion.

"After spending some little time in England, I went to France, and then saw the battlefields. Among the host of monuments that have been erected those of Canada are the best, and the Vimy monument is the finest of any in the battle area. On it are to be sculptured the names of 11,000 Canadians who fell at Vimy," he said.

In Waterton Lakes Park

Waterton lakes in Waterton Lakes national park, Alberta, were named by Lieut. T. Blakiston, R.A., who visited the territory with the Palliser Expedition, sent out in 1857, to find a feasible route across the mountains. Lieut. Blakiston visited these beautiful sheets of water on the way to explore the Kootenay Pass. He named them after Charles Waterton, the English naturalist and traveller.

The Sooner the Better

Two spinsters of uncertain age were exchanging confidences. One said:

"My dear, which would you prefer in a husband, wealth, position or appearance?"

"Oh, appearance by all means, and I want him to appear pretty soon, too."

Quite So

Traveler: "You have a wonderful crop of peaches this year. What do you do with those you can't use?"

Hotel Manager: "The peaches we can't use we eat."

Traveler: "We adopt the same principle with our orders. What we can't sell we cancel."

"The poor we have ever with us."

"Yes; and aren't their flippers a nuisance?"

A platinum wire has been made with a diameter of only one-thirty thousandth of an inch.

Rid Mexico
Of Drink Evil

President Gil Inaugurates Campaign To Restrict Sale Of Intoxicants

President Portes Gil's campaign to rid Mexico of the drink evil has gained such momentum that it has become one of the chief topics of discussion throughout the country and one of the principal subjects of legislation.

The president's appeal to state governments to second his endeavors has met with ready response in the form of orders restricting the sale and consequently consumption of alcoholic liquors, as well as regulating the number of saloons.

Governor Remondino Rodriguez, of Chiapas, has instructed the state treasurer to establish so heavy a tax on intoxicating drinks that their manufacture will be unprofitable. This measure, in addition to discouraging manufacture of liquor, is calculated to oblige the saloons to charge prices beyond the reach of the average man.

Governor Enriquez also has ordered that the saloons be forced to pay increased taxes, hoping through this means to cause many of them to close. Furthermore, he has prohibited the sale of intoxicants on ranches and farms, many of which employ hundreds of peons.

Similar, although less stringent measures have been adopted in other states, and the war department has prohibited sale of liquor to soldiers.

The government of Mexico City has placed a ban on sale of liquor in dance halls and has notified cabaret proprietors that they will no longer be allowed to employ waitresses.

Anti-alcohol leagues have been formed throughout Mexico among teachers, fathers, school children and workers, and lectures on the evils of the drink habit are being given in theatres, the schools, union headquarters and other public assembly places.

Little Helps For This Week

"The Lord will give strength unto His people; the Lord will bless His people with peace." Psalm xxix, 11.

Lo! fainter now he spread the shades of night.

And upward shoot the trembling Suppliant, we bend before the Lord of light.

And pray at early dawn.

That His sweet charity may all our sin

Forgive, and make our miseries to cease.

May grant us health, grant us the gift divine

Of everlasting peace.

—Heavy trans, by Edward Caswell.

There is indeed a peace on earth; but it is not the peace of inaction, of prosperity. It is the peace of him who accepts the condition on which life is given, who girds himself for the conflict, who has a clear, strong faith that conflict is wisely ordered, and who has an earnest in the energy it calls forth of the perfection of his soul and the triumph of a higher world.

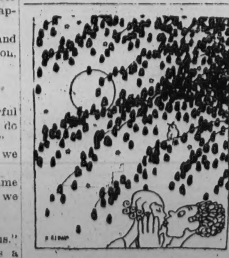

William Ellery Channing.

Worth Trying

When salt hardens in shakers, remove the tops, turn them upside down, fill them with hot paraffine and place upside down on a smooth surface. Before the paraffine becomes too hard open the holes in the shaker tops with a toothpick. Salt will keep quite dry in shakers, when the covers are treated in this manner.

A woman in Russia has been pronounced dead on five occasions in the course of a few years. An ideal grandmother, we should say, for some office boy in the baseball season.

Petrels are so named because their habit of walking on water recalls the biblical story of Peter.

"My darling, if I had to choose between you and a million pounds it would break my heart to have to choose the million." Der Wahre Jakob, Berlin.

A Woman's Pride

The useful pride which makes woman careful of her appearance and complexion finds a help in the purity and delicate clinging fragrance of

The Singing Fool

By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

As gray dawn creeps over the New York skyscrapers, Marcus, the famous revue producer, is leaving the fashionable Plaza night club with a party of four. An actress companion suggests that they go to Blackie Joe's club, where the "fun is just starting," and Marcus consents. At Blackie's shabby club the newcomers are seated at a "ring-side table" by Al Stone. Blackie's head singing waiter and comedian, who wonders who they are, Grace, the pretty cigarette girl, catches the name "Marcus," and hopes the celebrated producer will do something to help Al, whom she admires tremendously.

CHAPTER II

As Al hurried toward the door leading to the bar, Grace speculated as to whether she could cut across and intercept him. But he was moving too fast and there were too many tables in between. She decided to wait until he returned, then she would drop a word as to Marcus' identity. It was necessary for Al to "know that," so he could put everything possible into the comic songs he would sing in a few moments.

Grace's sensitive young face was a study in devotion. Al Stone had been her best friend at Blackie's place. When she had taken the job of cigarette girl a few months before, the crowds, waiters, bar-tenders and performers frightened her, the rough-and-ready atmosphere of the place made her timidly draw in herself. Then it was that Al had put his hand kindly on her shoulder and looked down into her apprehensive brown eyes.

"Don't be scared, kid. Everybody's all right here." Two minutes later, Al had forgotten his words. But Grace treasured them and knew them by heart. She had promptly fallen in love with him. Al did not know this, no one knew it, not even Grace herself. She merely knew that the dark, gentle eyes of the young singing waiter had a quality she had never seen in the eyes of another man.

Now he was obscured for a moment as a chorus of dancing girls tripped across the floor. The chorus was agile, but that was all you could say. They were neither graceful nor beautiful.

Marcus, the producer, the connoisseur of femininity, the despot who picked only the loveliest girls for his revues and rehearsed them for months until they were step-perfect—Marcus made no attempt to hide his disdain at this apology for entertainment. Grace saw him turn to the pretty actress at his table with a bored look that said only too plainly: "So this is what you brought me to see!"

Then Grace heard a voice behind her, a rough masculine voice.

"Hey, cigarette girl, come here." She swung about and carried her helping tray of cigars and cigarettes to a nearby table. Three men, bleary-eyed and uncertain of speech, looked up into her face.

Had Diarrhoea Bowels So Active Feared For His Life

"Mrs. S. J. Jago, Canobie, N.B., writes: 'My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved.

"I have used it for my little children, and my husband and myself. My husband gives it great praise, and when he goes away from home to work he always takes a bottle with him."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1792

"Want some—cig—cigarettes," said one of them.

Grace lowered her tray for this patron to make a selection and, as she did so, became aware that one of his companions had drawn his chair closer to her.

"Say, you're a nice kid," suggested the second man, with a rapid expression on his face. "Do you know—you're cute. I been watchin' you."

Grace smiled faintly, but ignored him otherwise, while she passed out the cigarettes to the first customer. This was what Blackie and Al had told her to do when the patrons became personal in their remarks—say nothing and attend to business.

As she leaned across the table to hand another pack of cigarettes to the third man of the party her skirts rose a trifle. Without looking she knew that one of the customers was looking her up and down. Then suddenly she felt her other hand in his tightening grasp.

She straightened up sharply and tried to draw away. She knew she mustn't make a scene, for, after all, she was only a night club cigarette girl, and the customers must be humored a little.

At this moment Al Stone, just about to turn the corner to the door leading to the bar, shot a glance across the room and visualized Grace's predicament in a flash. In a moment he had veered across, while Grace gazed beseechingly into the drunken man's eyes and murmured, "Please let go."

Then Al loomed at her side and stopped sharply on the man's foot. A cry of pain came from the customer and he released Grace to seize his aching toe. The girl caught Al's signal and made good her escape, while the three unsteady Don Juans stared up in bewilderment at Al's broad grin.

"Why did you step on my foot?"

"Did I do that? I'm sorry."

Again the broad, but guileless grin from Al. Then he moved off, swiftly as he had come.

But now he felt a hand lightly on his sleeve and looked down into Grace's wistful eyes.

"Thank you, Al," she murmured.

The waiter patted her on the shoulder. "That's all right, Grace. Those things will happen. If they bother you again let me know."

Al glanced down at the diminutive Grace and his handsome face softened, as it always did when he reassured her. But in the tenderness of her dark eyes he saw only the gratitude of someone he considered merely a sweet child. To him the marked evidence of acceleration in her breathing and the faint tremor of her warm and lovely little mouth were only her reactions to fright. Nor did he see her head turn, as he moved away; while her eyes followed him adoringly.

Not until he disappeared and the throb of her heart swung back to normal did Grace recall that she had a message for him.

But when the singing waiter reappeared with his four beers on a tray he did not head straight across the big room. Instead he paused in the barroom entrance and glanced down a corridor. Through an open doorway he saw a good-looking blonde girl, a few years older than Grace, seated before a mirror in a tiny dressing room. She was studying her reflection in a self-satisfied way as she slowly and rhythmically brushed her luxuriant golden hair. This was Molly Winton, the ballad singer at Blackie Joe's.

Al moved slowly toward the door as if drawn by a magnet, forgetting his order for a moment. His eyes lit up at the sight of Molly and with fascinated gaze he watched her white, rounded, raised arms protruding from her pink silk dressing gown as she slowly manipulated the hair brush.

Molly was undoubtedly a pretty girl and one of the favorites at Blackie Joe's. Yet there was a hardness about her eyes and a petulance discernible at the corners of her mouth that boded no good for the man who would fall in love with her. Al, however, was blind to these defects.

As he neared her dressing room door she saw him, gave him one indifferent glance, then turned to the mirror again to rouge her shapely lips. At that moment of studying her reflection Molly, the heart-song specialist, was gazing at the person she loved best!

(To Be Continued.)

Sixteen Planes Cross

The landing of the French monoplane "Yellow Bird" in Spain brought to a total of 16 the number of times the Atlantic Ocean, north and south, has been crossed by heavier-than-air machines. Dirigibles have made the crossing five times.

The world uses eight matches per day per inhabitant.

Old London Church

Sanctuary Made Famous By Chas. Dickens Is In Danger Of Crumbling

The church of St. George-the-Martyr, immortalized in "Tattle-Tell" by Dickens, as "Little Dorrit's Church," is in danger of crumbling. All London knows St. George as "Little Dorrit."

Onion cracks many feet long have appeared in the walls and crypt. These are gradually widening until now the whole structure has been placed in danger.

The authorities have threatened to condemn the building unless prompt action is taken to make it safe. The rector of the church has started a drive for \$25,000 for repairs to save it.

"Little Dorrit's Church" was built in 1736, and was given its popular nickname because one of Dickens' characters often slept in the vestry with the church register as her pillow.

Upon the site of St. George-the-Martyr stood another church dating back to 1122 in the time of the Saxons. It is the earliest if not the oldest church in London.

Service For Plane Passengers

May Receive Market Reports and Musical Programs Is Prediction

Aeroplane passengers of the future may expect to listen regularly to market reports, baseball scores, and musical programs, if the prediction of W. P. McCracken, Jr., of Cleveland, assistant secretary of commerce for aeronautics, comes true.

"These programs could be tuned in right now, for that matter," McCracken indicates. "In favorable weather the pilot of a properly equipped plane has no need of his radio apparatus."

McCracken predicts that great developments will be made along the line of radio transmission from ground to plane and from plane to ground.

DO NOT NEGLECT YOUR LITTLE ONES

At no time of life is delay or neglect more serious than at childhood. The little ones come quickly and unless the mother is prompt in administering treatment a precious little life may be snuffed out almost before the mother realizes the baby is ill. The prudent mother always keeps something in the medicine chest as a safeguard against the sudden illness of her little ones. Thousands of mothers have found, through experience, that there is no other Tablets to equal Baby's Own Tablets and that is why they always keep a box of the Tablets on hand—why they always feel safe with the Tablets.

Baby's Own Tablets are a mild but thorough laxative which by regulating the bowels and stomach, banish constipation and indigestion; break up colds and simple fevers and promote healthy, natural sleep. Concerning them, Mrs. Louise Smith, St. Eugene, Ont., writes: "I have been using Baby's Own Tablets ever since baby was a month old and I have found that they reach the spot and do more good than any other medicine I have ever tried. I always keep the Tablets in the house and would advise all other mothers to do so." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Why Shouldn't He

Abe Lyman, the Hollywood jazz bandman, who is playing at the Kilt Club, in London, England, recently journeyed up to Scotland for the week-end. Returning from Glen-eagle to London, Lyman had as a travelling companion in his compartment a rather close-mouthed, middle-aged Scotchman. After an interminable number of stops at various stations, he found he was looking more dour and solemn than ever. "It's a long, wearisome journey," remarked Lyman, by way of making conversation. The Scotchman looked at him with an angry frown.

"So it ought to be," he replied frigidly. "It cost fifty-nine shillings, nine pence!"

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Evening Up Balance

United States is growing fat on the manufacture of Canada's raw materials. Since United States will not accept a reciprocity of trade, Canada will have to retain some of that fat within her own boundaries by placing embargoes on those raw materials that will enforce their manufacture within the Dominion, and by establishing a reciprocity of tariff that will even up the trade balance between the two.

Minard's Liniment for Neuralgia.

Why go to Peru?

When crude oil is so plentifully available here in North America, why does Imperial Oil Limited go 4000 miles to Peru for the crude from which Marvelube is made?

It is because Peruvian crude has lubrication properties which make it particularly desirable as a base for a superior motor oil.

That is why Marvelube is giving aircraft operators longer periods between engine overhauls and a greater margin of safety.

Marvelube meets the needs of the modern high-speed motor, in the air or on the road, because its carbon-free and heat-resisting superiorities are created by Nature herself.

Let Marvelube give you the benefits of better lubrication. There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. See the Marvelube Chart at Imperial Oil dealers and service stations.

To Capture Cup

Sir Thomas Lipton To Make Another Effort To Win International Honors

"I'm going to do my darndest to bring the cup back," Sir Thomas Lipton said in the first interview he has granted since acceptance of his challenge to another international yacht race in 1930.

On the veranda of his mansion at Scougiate, Sir Thomas appeared vigorous and healthy, despite the fact that he will be celebrating his 80th birthday at the time when the yachts are racing off Newport a year from next September.

"Do I think I can win the cup this time?" repeated the veteran sportsman, pondering for a moment. "Well, I am going to do my darndest. I hope and trust we will have good luck. To bring back the cup would be one of the greatest pleasures of my life."

Col. Duncan, Sir Thomas' racing manager, said that the Shainrock-V, the challenging yacht, would not be a freak boat, and expressed the opinion that the rules for the 1930 race as outlined from New York bettered the chances of the challenger.

Bicycle Boats Are Latest

Have Become More Popular Than Swimming (United)

Bicycle-boating across the Channel has replaced swimming in popularity.

Three athletes have already succeeded in crossing, so far this year. The latest was a woman, Miss Aimee Plummer, who pedaled her way over on a nautical bicycle in 9 hrs. 19 mins. She was so worn by the effort that she fainted as she got off her seat.

The bicycles are fitted to two long-pointed pontoons and the pedals are attached to paddlewheel propellers. The sea-bikes make about five miles an hour, but currents bother Channel-bikers.

"My daughter is about to be married and I want to get her a nice gift," said a prosperous-looking man who entered a house furnishing store, adding: "Let me see your nutmeg graters!"

Farmer's Average Income

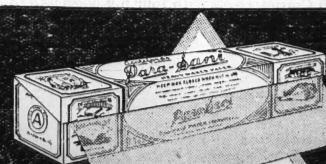

Cash Income Per Farm In Prairie Provinces Shows Increase For Last Year

The average cash income per farm home in the Provinces of Manitoba, Saskatchewan, and Alberta last year was \$2,544, exclusive of the value of seed, feed, meat, vegetables and other commodities produced and retained by the farmer for his own requirements, according to the Northwest Farmer. This is an increase of \$70 per home over the previous year.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Wife: "Can you let me have a little money?" Husband: "Sure, as little as you like!"

Maggies build large strong nests which they use for several years.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Appleford Paper Products

J. C. McFarland Co.

Main Street

Miss Olive Rush left Monday for a two month trip to the Pacific Coast. Mr. and Mrs. J. H. Elliott have moved into their new house on Third Ave. Miss Sadie Lennon, of Provost, Alta. was visiting in Irma this week.

Mr. Chas. Archibald and Miss Grace Peterson have been taking in the Fair at Calgary this week.

A number of the members of the Orange Order intend going to Vermilion Friday to celebrate the glorious 12th.

Mrs. J. A. McDonald left Friday night to spend a few days in Edmonton last week.

Mr. and Mrs. A. E. Peterson went to Edmonton Friday to arrange the Wainwright exhibit at Edmonton Fair.

A Wheat Pool meeting will be held in Keifer's Hall Tuesday, July 23rd at 2 o'clock.

Miss D. Burzon returned Monday after spending a week with friends at Westlock, Alta.

Ladies Aid met at the home of Mrs. J. Jack Thursday.

Rev. and Mrs. Geeson motored to Edmonton Tuesday afternoon.

Mrs. Ralph Dunlop, of Indian Head Sask., arrived in Irma Tuesday to visit with her parents Mr. and Mrs. Fenton.

Mr. and Mrs. Geo. Hipperson was in Edmonton last week end. George shipped three cars of cattle to Edmonton last week.

Mrs. M. M. Ross returned home Sunday from Wainwright hospital with her infant son which was born on June 22nd.

Mrs. S. Johnson returned Wednesday after visiting with friends near Veteran, Alberta, for a week.

Mr. Ross Saunders who was taken to Wainwright hospital last week is doing nicely.

Born to Mr. and Mrs. George Ambler, at Mannville hospital Saturday, July 6th, a daughter.

Margaret & George King of Regina arrived in Irma the first of the week to spend their holidays with their grand parents Mr. and Mrs. W. H. King.

A son arrived at the home of Mr. and Mrs. Carbol, both are doing nicely.

Mr. H. N. Lund, clerk in the local bank, returned to work last week after being on the sick leave for some time but had to return home Monday as he was unable to resume his duties. Mr. Elford was in Edmonton Thursday on business.

Mr. A. E. Peterson left Thursday night for Edmonton where he is arranging a display of products from the Wainwright Constituency at the Edmonton Fair. This is the first year that Wainwright has been represented at the Edmonton fair and we wish Mr. Peterson success with his exhibit.

While motoring from Wainwright Wednesday night Mr. C. G. Purvis of Viking broke an axle in his car about ten miles east of Irma necessitating him staying in Irma over night. Mrs. Purvis and a number of friends were accompanying him.

Sunday and again Wednesday the Irma district was visited with a very heavy rain, while the rains have been too late to assure anything like a usual crop it will help the late grain and feed and has loosened the ground so the farmers can continue breaking.

Mrs. W. E. MacRae returned Monday after spending six weeks in the Grand Prairie country. Mr. MacRae motored to Edmonton to meet Mrs. MacRae, and experienced considerable trouble returning through the mud.

— O. Croteau, Poundkeeper, Wainwright, Alta.

Here and There

(194)
More than 11,000,000 tourists visited Ontario during 1928. The point about \$100,000,000, according to figures issued at the Provincial Parliament Building in Toronto the other day. This is an increase of over 20 per cent. over the record made last year.

Production of tobacco in 1928 totalled 40,976,375 pounds from 45,128 acres. Of the total output the Province of Ontario accounted for 32,265,850 pounds from 32,654 acres; Quebec 8,546,325 pounds from 10,268 acres, and British Columbia 164,290 pounds from 116 acres.

Ethel Catherwood, who distinguished herself as an athlete representing Canada at the Olympic games in Amsterdam in August, has been honoured by the Canadian Pacific Railway. A station on the recently constructed Rosetown-Perdue branch has been named "Catherwood," after her.

Twenty-five years ago Thomas Hubert, now employed as a baggage man on the C. P. R. between Ottawa and North Bay, lost a valuable silver watch while working in a field near Pembroke. The other day a glittering object was turned up by a plough. It was Hubert's watch, the glass broken and the hands gone, but still retaining a brilliant lustre. The field had been ploughed many times since it was lost.

Toronto is preparing to receive the largest number of prominent baseball figures ever to be in Canada at one time. The National Association of Professional Baseball Leagues will meet there shortly and every baseball club in America will be represented. Judge Landis will be on hand, and the total attendance is expected to amount to over five hundred delegates coming from points as far as Pueblo.

The trainload of artificial snow that was brought from Hollywood to Lake Louise recently was not required by John Barrymore, in producing an Alpine movie story to be released shortly, as plenty of the real stuff was available at the glaciers. This popular actor, with Camilla Horn and a cast of about twenty-five persons, spent some three weeks at the Chateau Lake Louise, rising each morning at four o'clock in order to reach their "locations" on Victoria and Sackback Glaciers in time to get the best light effects in the morning for their various "shots".
